

AIRTEC Motorsport breather kit for Fiesta ST180 fitting guide.

Fitting kit:

1x Breather tank

1x Dipstick

2x Pro Hoses silicone hoses

4x Jubilee clips

1x Bolt, 2 washers & nylock nut to secure breather tank onto original inlet manifold

1. Remove engine cover, pull upwards firmly

2. Unclip / remove original breather hose from top pipe and top of cam cover as shown below

3. Loosely mount breather tank into place using existing hole on manifold, with supplied bolt (no drilling required)

4. Fit new silicone hoses as pictured, once happy with position, tighten breather tank and all jubilee clips.
Please note if not running manifold spacer, these may need trimming down by 10-15mm using a sharp Stanley blade

5. Refit engine cover
