

AIRTEC Motorsport Fiesta MK8 ST Engine Breather Fitting Instructions.

Parts include:

- Engine breather including dipstick
- 4 X 25mm jubilee clips
- 2 pce silicone hoses
- 1 X cable tie
- M10 X 16 Socket bolt

Tools required:

- 8mm allen key
- Flat blade screw driver

1. Remove engine cover by giving a firm pull upwards.

2. Install engine breather onto left hand side of engine as shown in the picture, the breather is secured to the engine with supplied M10 X 16 socket head bolt.

3. Remove original clip on vacuum pipe as shown in attached photo, unclip by simply pulling the blue tab outwards.

4. Fit new Pro Hoses breather hoses into place as per photos below

5. Once hoses are in place, tighten all jubilee clips.

6. Trim engine cover as per guidance below, the breather hoses fail the cover on the underside, it requires some of the foam to be removed to fit the engine cover back on.

7. Once installation is complete, ensure to check dipstick in between service intervals.
