<ul style="list-style-type: none"><li>• Ratchet and 13mm Socket</li></ul>	<ul style="list-style-type: none"><li>• 7mm Allen Key</li></ul>
---	---

**PLEASE THOROUGHLY READ THESE INSTRUCTIONS AND MAKE SURE YOU ARE FAMILIAR WITH THE STEPS BEFORE CARRYING THEM OUT**

# Instructions:

1. First locate the original exhaust tunnel brace and remove the four 13mm bolts securing it in place.  
**Please note:** these bolts can be very rusty and are prone to snap.

2. Now install the new AIRTEC Motorsport brace in the same location. If you have an aftermarket/larger exhaust system, you may need to use the spacers supplied in the kit to allow clearance.

3. Finally take a 7mm allen key and secure everything in place with the bolts provided.
