

AIRTEC Fitting Guide

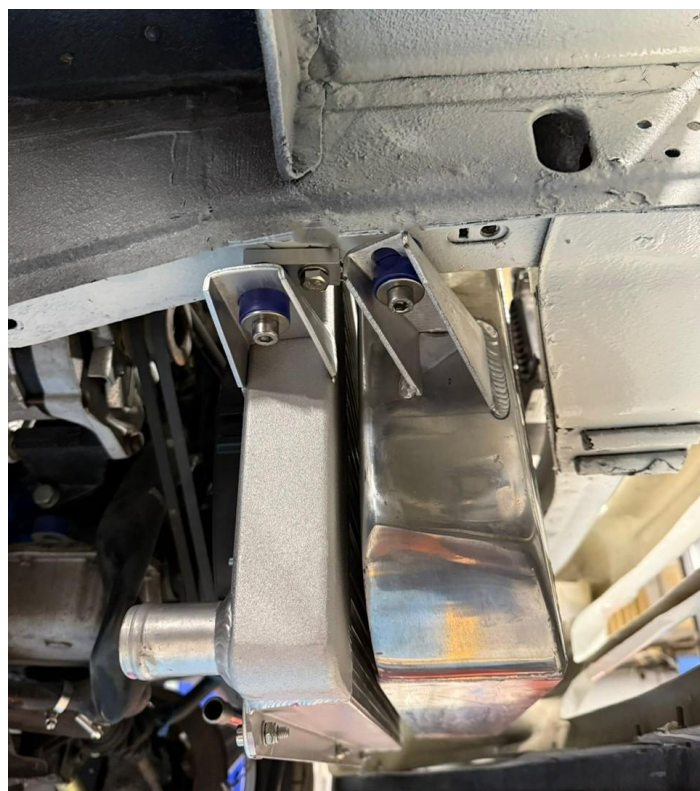

MOTORSPORT

Vehicle:	Ford Sierra Cosworth (NOT Escort)
Product:	Top Feed 100mm Intercooler (NOT required for 70mm or RS500)
Part number:	ATINTFO38

Please note: The intercooler is a direct fit but does require the mounting brackets that come with the kit to be mounted in a particular way in order to space the radiator back and allow the intercooler to fit in place.

Place the intercooler in front mounting holes and then use the other hole to mount the bracket.

You can then mount the radiator to the rear mounting holes, as shown. Please note: The optional mounting bush kit is shown here.
